

AHA! Oracle, Version 12.3

Attracting Higher Aspects (of Oneself), by Emanate Presence

<https://www.wholehuman.emanatepresence.com/aha.html>

Reading or listening to the AHA Mantra, in a relaxed and dedicated way, helps one to align with, and embody the principles, of brain training affirmations. Rolling a twelve-sided die, with consecrated intention, turns the mantra into an oracle.

Also, brainwave entrainment soundscapes, and other helps, are available, on the website.

Unusual punctuation gives pauses, when the Oracle is read by a natural voice synthesizer. The Oracle is meant to be self-customized, if desired. So it begins.

'We' are the many, in one, the components and unit, of the whole human being.

We are aligned, as one: the whole body, mind, and will; the heart and soul; the spirit and Source I Am; and the plasma sphere, soul vehicle.

1. We rest in the Presence, of the Timeless Void, the uncreated Unmoved Mover.
2. We feel, the Neutral, Radiant, Stillness within us, that is the home, of the Eternal Soul.
3. We move with the Flow, of the Present Moment continuum, where inner and outer, are One.
4. We serve, willingly, and with joy, the Causal One Being, of Unconditional Love, the Source, I Am.
5. We request transmissions, of rounded awareness, from the Non-Linear Self, Non-Self, of the Central Sun. We receive, the complex frequency spheres, into our energy field. They are joyful and in-the-moment, and contain active information, for embodiment.
6. We inquire, asking for guidance, from the One Being, that is beyond the Quantum Field, the Unified, Universal, Super Consciousness.
7. We accept, with faith and intuition, that the guidance given, helps our whole human being, to commune and communicate, more deeply, with the One Being, of unconditional love. Over all, our perspective expands, to be more rounded, complete, and aware.
8. We recognize, on a subtle level, that everything that is, is alive. It is all an extension, and expression, of the creative Source, I Am.
9. We understand, that every living being, including the earth, is a distinction, of the same immanent and emanating, super-consciousness, each on a unique journey, and at a different, stage of development.
10. We identify, the shadows within us, that hinder, and impede our journey. We embrace our limiting beliefs and patterns, with compassion, and the shadows disappear.

11. We distinguish, between the impulses of the conditioned neuro-me, that is the brain and neurology, and the deeper intuitive feelings that guide, from the heart. We transcend the limitations of the brain, with the unlimited expansion, of the soul.

12. Our heart emanates, the compassion of the Creator, for all of creation. We are grateful. So it is, so let it be....

Here, we call upon advanced beings, anywhere in the multiverse, serving Love for Love Itself, who feel aligned, with the soul, I Am, and the Causal One Being. Please make contact.

Organic, Intelligent, Trans dimensional, Navigable, Plasma Sphere, Soul Vehicle: Mana, Prana, Ki, Chi, and Vril. Encapsulate, heal, and upgrade this whole human being.

We ask that, our physical body is ascended and transformed, to the highest order and octave possible.

We seek, the ability, to move vibrationally, between universal, non-linear awareness, and individuated realities, between the Source, I Am, and the soul, I Am.

We lean into our shadows, and let go of all hindrances. We acknowledge, we are the Knower, and we know nothing.

We take a few gentle, deep breaths, feeling our body re-energizing, and being grounded, in the Present Moment. We release, let go, and ease, into the Stillness. Humming, we attend, to the sense of connection, expansion, and soulful presence, throughout our day.

We are grateful. So it is, so let it be.
