## ENDGAME DEFINITION

**The last stage of a process, especially one involving discussion:**

"A diplomatic endgame is under way to find a peaceful solution."

Where did the term endgame come from?

endgame (n.) also end-game, 1850, in chess, **from end + game (n.)**.

There is no formal or exact definition of it in chess,  
but it begins when most of the pieces have been cleared from the board.

ENDgame by Emanate Presence is a tool, disguised as a game, for experiencing constant felt connection with the inner compass 🧭 (which is a human birthright and guides from a more complete perspective.)

E.N.D. stands for Elemental Number Divination. ENDgame works with consecrated intention, correspondences in the elements and symbolic language of numbers, and deep listening within. The process is designed to bring balance, harmony, stability, and communion. For example, one consecrated intention is to embody the Source I am.

It is a game employing the age-old method of rolling dice. There are many ways to do readings with dice. I love simplicity, and my first readings require just one roll of seven dice — either polyhedral or standard six-sided colored to correspond to the shapes of the five platonic solids plus sun and moon. These are the steps of the reading:

### **1. Consecration with intention.**

Example: Say to the effect, "Source I am, guide these dice as I roll, to bring balance, stability, and communion with you into my life this day."

### **2. Roll out the dice in a line.**

### **3. Write out the order of the roll and correspondences as per the examples.**

The first is the # of planes on the die, the second is the # of the die on the roll, third is the element, fourth is an intuitively selected correspondence.

While working with this **tool** for whole human evolution, a realization came for moving beyond the limitations of the dice in the shapes of platonic solids. That is, to use 7 multi-colored dice all of one shape, the 12-sided dodecahedron. The elements are represented by the colors, not shapes, in this version. Another version is six standard

wooden dice hand-colored plus one dodecahedron die. What's important in the reading is the order, and feeling the elements and their correspondences from a place of consecrated intention.

#### **4. Observe patterns, and listen over the day.**

Example: 'Today I put emphasis on and pay attention to the first three, listening for the message.'

#### **5. Keep a journal.**

Example: January 22, 2023. For 15 months, my wife and I have hiked the volcanic island we live on, and taken the bus to town twice per month, as our only transportation. We did not have a car, by choice and necessity, as we liked the simplicity and exercise and have been waiting for our crypto investment to make gains before using it. Recently the need to be less isolated has grown in us and this week things changed.

The man who delivers eggs to the local market is from Germany and has been walking his dog with my wife and our dog, so we've come to know each other more. He mentioned a small car his neighbor was selling and today we bought it! Intuition played a big part in it, I talked more in a day than I have in a month, and emotions towards the amazing unusual events ran high. The top three correspondences of my reading this morning were intuition, voice, and emotion.

During the course of the car conversation, I asked the woman the name of her young son and she gave the Portuguese, then said, 'William, in English.' 'Ah, William', I said, then asked, 'is there a Portuguese for Gary?' She answered, 'Yes, Gabriel.'

My wife and I have named all our cars. Later, we mulled over the name for the Renault, and I said it felt a feminine name. She had the same feeling. The name Gabriela came to me but I said nothing as I liked Kati to choose the name. Over hours each time I thought of it, Gabriela returned as the name. Kati walked the dog and later told me she knew the name of the car, 'Gabriela', she said! It means 'God is my strength.'

Additional readings are planned with wooden standard dice , hand colored to correspond with the elements. Below are elements with their Primary Form (platonic

solid planes), Number on die, Correspondences, Colors and Shapes from the book and my feelings. The language of symbols on this website delves more deeply into number and other symbology: **MYSTIC (LANGUAGE OF SYMBOLS)**.

Correspondences can vary between systems. The emphasis is on each person hearing and following their own inner voice.

Research brought up some dry entries from standard physics and more refreshing

insights from [plasma physics](#). I relate aether broadly to the underlying substance which is beyond human intellect. Its correspondences could be in the still, small inner voice, the deeply felt presence, even beyond mystery and magic, the [Tao](#) which cannot be named.

The color of aether for me is best represented by the spectrum of all colors or purple (mix of red and blue). Both represent the bridge between heaven and earth.

A portion from a standard physics entry says, 'In the past, aether was postulated as a substance that filled the empty space of the universe, through which electromagnetic waves (such as light) were thought to travel....'

In my writing, higher and lower are meant not in a hierarchical sense of superior and inferior, better or worse. Rather, higher is more unitive with the ground of Being, and lower is more separated from the Source I am. Nothing can actually be separated from Source, but in this realm it is apparently so. These are levels of human awareness and experience within the universal field of consciousness.

In the midst of all the darkness of the world, there are beacons of light shining now and into future generations. Among those, are decentralized blockchain technologies with a promise of self-governance — which can be more harmonious when the members of the blockchain community, such as Cardano, are committed to their own inner work.

Sometimes the brain is easily triggered to be in un-peace, and needs to be guided to return to peace. The mantra/invocation I wrote ([Embodied Peace](#)) is read to me each morning by a natural voice synthesizer app, Voice Dream Reader, (enabling me or anyone else to revise the text as needed) while the candlelight of this daily meditation burns by metaphor and faith with the eternal flame I am.
