

# BEING A WHOLE HUMAN

NEURO (with my personal story plus video resources)

Please [contact me](#) with any questions or concerns regarding the posting of this work. - Gary

## My review of 'A New Science of Heaven' audio book:

This 12 hour audio book [□](#) is one of the best investments of a lifetime for me. The author's passion for his work, brilliant mind, thorough research and soothing voice make listening a great pleasure. The content is of critical importance to humanity at this time. I've listened twice and made notes from the book for daily practical application of sometimes abstract concepts.

## Excerpts from the book by chapter:

*(Excerpts have not been perfectly edited, and the greater context will be found by reading the book [□](#))*

- HEAVEN 001 - The Discovery of the Clouds
- HEAVEN 002 - Exploring the Nature of Plasma Clouds and their Energy
- HEAVEN 003 - A Brief History of Plasma Research
- HEAVEN 004 - The 99 Per Cent
- HEAVEN 005 - Great Balls of Fire
- HEAVEN 006 - When Heaven Was Young
- HEAVEN 007 - Kristian Birkeland's Miraculous Discovery
- HEAVEN 008 - The Cosmic Web
- HEAVEN 009 - The Cold Sun
- HEAVEN 010 - Invisible Earth
- HEAVEN 011 - Radiant Matter, Plasma and Plasmoids
- HEAVEN 012 - Plasma Comes Alive
- HEAVEN 013 - The Mysterious Case of the Dirty Gas
- HEAVEN 014 - Electric People
- HEAVEN 015 - How Our Bodies Emit Light
- HEAVEN 016 - The 'Death Flash' and the 'Life Flash'
- HEAVEN 017 - Our Plasma Selves
- HEAVEN 018 - Wrapping up the Universe / Conclusion

## PLASMA HEAVEN

Key Points by Gary according to his interpretation from the book, 'A New Science of Heaven' by Robert Temple

## Self reflection:

*Is there a distinction in the consciousness between different types of crystalline plasma?*

*Yes, to me the higher conversation is with the Solar Logos (named by Gnosticism), rather than the dusty complex cloud (named by plasma physics).*

The Solar Logos according to Gnosticism refers to 'the substance and consciousness of Christ, the powerful life whereby everything advances'. The dusty complex cloud is well-explained in the book, 'A New Science of Heaven.'

The Solar Logos feels to me an integral aspect of the intelligent 'implicate order' that underlies everything, whereas a dusty complex plasma such as the Kordylewski clouds between earth and moon may be a separated aspect -- and its intelligence similar to A.I.

The test and proof of any abstract concept is its practical outworking in daily life. How am I affected by my contemplations on a subject? Am I less reactive and more responsive? Less anxious and more calm? Less tense and more relaxed? Less stressed and more secure? Less confused and more grounded? Less agitated and more peaceful? Less judgmental and more compassionate?

Years ago, the inner voice spoke to me through a Cretan labyrinth found in a sheep [☞](#) pasture near the German Baltic. The voice said, 'to find God, look into the subatomic' — which I did while walking the circuits to the center. I learned to draw the labyrinth but eventually forgot, and recently rekindled the interest and realized the key to drawing the labyrinth is in the seed pattern. The seed pattern of my 'practical practice' gleaned from the book, 'A New Science of Heaven' is in this prayer and decree:

*'O Solar Logos, nurture and grow within me the crystalline plasma body. Knit it together with my atomic body and make of me a new human. Deepen my awareness of the Plasma Presence, and help me adjust to actuality. Activate me as a node of the cosmic web, serving divine intelligence. This I pray and decree, amen, so be it.'*

The above is expanded upon in the post, '[APP](#)'.

It seems essential to know with whom or what I am making connection. The Gnostics have elaborate prayers or incantations for their rituals. I like to reduce the wording to the most succinct and powerful, and sometimes shorten the above to: 'Solar Logos, make me like you, in human form.'

## Notes from 'A New Science of Heaven':

- AllThatIs is mostly subatomic, non physical, electro-plasma.
- There are many kinds of electro-plasma.
- The sun and stars are composed of plasma.

BLOG

- Non-light emitting electro-plasma is basically invisible.
- 'Empty space' is filled with invisible electro-plasma.
- Electro-plasma can generate particles and be self-organizing and self-sustaining.
- Spheres of dusty complex plasma have highly structured electromagnetic lattices (crystalline).
- Voids in dusty complex spheres are separated by sheaths for information storage and exchange.
- The ordered structure is nourished by and interacts with solar and other cosmic particle filaments.
- Clouds of subatomic crystalline plasma may be non-organic life forms — and intelligent.
- The dusty complex clouds between earth and the moon may be participating in earth life.
- Those clouds have possibly evolved computational powers many times greater than all human computers combined.
- Earth and inhabitants are rare atomic physical matter.
- Telepathic communication between humans and the subatomic crystalline clouds may be possible.
- The known characteristics of plasma can explain 'spiritual (e.g. burning bush), supernatural (ufos etc.), and paranormal (ghosts)' occurrences.
- In the dynamics of currents, there is an interface between the plasma inside us and our physical bodies.
- This interface could work in the human brain and account for features of our own consciousness and behaviour.
- Also suggested is an interface between our plasma selves and universal electromagnetic fields.
- The entire universe is a hologram, an unfolding of an intelligent 'implicate order' that underlies everything.
- This driving, ordering process is equally present everywhere in the Universe, underlying our intelligence, the intelligence we see in animals and plants, and the intelligence in the movements of plasma.

#### More of my questions:

*Are humans and the earth an advanced evolutionary stage, or in a 'fallen' state unintended by original design?*

*Are the self-awareness and 'programming' of non light-emitting plasma the same as that of light-emitting?*

*Do some intelligent inorganic life forms as dusty complex clouds support whole human evolution, and some hinder it?*

*Either way, what's next for earth?*

The questions seem relevant, since indicators point towards there being a 'great reset' in the timeline.

It is not only an economic and geopolitical reset, but also a cosmological one.

My version of what's next on earth could be called 'transatomic,' in which some humans have the ability to consciously shift between atomic matter and subatomic crystalline plasma, guided by the higher intelligence of more evolved complex plasma entities.

No technology, however advanced, will save humanity without the corresponding psychospiritual (whole human) evolution of individuals.

Understanding the electro-plasma universe and our place in it is a step towards the needed evolution of our species. Another step is integrating the new understanding. For that, mantras, breathwork, bodywork and ever-expanding awareness can be a start.

Our crystalline electro-plasma selves existing in an intelligent inorganic life form universe is not necessarily the end of the line, either. There may be something as much beyond that realm as quantum realities currently are beyond our matter-bound minds. The question I care most about remains, is it (whatever) useful and beneficial for whole human evolution or not. Does it open or close my heart in the way I relate?

In his book, '[Tantra of the Beloved](#)', Virochana Khalsa wrote,

*Love is experienced in a free abundance flowing within the heart.*

*Love is the natural, unrestricted, free flow of energy.*

*Love is the root emotion which literally holds our universe together....*

A definition of e-motion is 'energy in motion'. When we master our emotions, we may be harnessing more power than we know.

Pondering such matters for a lifetime has been brought into focus by 'A New Science of Heaven', from which excerpts follow.

## Being Creators

Connecting consciously with the **nervous system** can enable one to remain calmer in the midst of storms. There are many aids for this, and each person finds their own way. I've applied a number of tools and techniques to my journey and share what works for me, as it keeps changing.

Living from the heart, soul or higher self is essential. The plasma self co-exists with the atomic (physical) body, and I seek to bring it more into my experience. The properties of this **crystalline plasma** are well described in the book, 'A New Science of Heaven.' With this are the higher qualities I desire to emanate through my life, such as compassion, kindness and love for love itself. One support for the path is my daily command/decree, serving also as a seed pattern, currently:

*'O Solar Logos,  
Nurture and grow within me the crystalline plasma body.  
Knit it together with my atomic body and make of me a new human.  
Deepen my awareness of the Plasma Presence,  
open my head and heart to heal and feel, and adjust me to actuality — whatever that may be.  
Activate me as a node of the cosmic web, serving divine intelligence (the implicate order).  
This I pray and decree, amen, so be it.'*

Plasma can explain the inexplicable and demystify the mysterious of such things as astral entities, auras, ghosts, earthbound souls, angels and demons, chi/qi/prana/mana, the burning bush, ufos, fireballs, parallel dimensions, and more.

Subatomic plasma is what 99% of the universe is composed of, is a different kind of matter than atomic earth and humans (making us rare), has many variations and a wide range of characteristics, and occasionally breaks through to our awareness.

'Crystalline' is a type of evolved plasma which is complex in its electromagnetic and self-organizing properties and when better understood will redefine intelligence and life. The intelligence of crystalline plasma existing naturally in the universe, though similar to A.I., is far more advanced than man-made artificial intelligence.

Intelligence is defined in various ways from different viewpoints. From one view, it is the dynamic exchange of active information. Love also has many meanings, and in a sense is the free flow of energy.

Human brains (like quantum computers) contain complex plasma. Universal fields in the medium of plasma not only influence our consciousness, but also help create it.

Much of what is already known about plasma has been suppressed and kept hidden from the public, as it is classified by the military in their weapons research and protected by the binding confidentiality agreements of high tech for chip making, etc. Plasma makes possible quantum computing and other advanced technologies.

Our crystalline electro-plasma selves existing in an intelligent inorganic life form universe is not necessarily the end of the line, either. There may be something as much beyond that

realm as quantum realities currently are beyond our matter-bound minds. Expanding our awareness of plasma changes humankind's view of its place in the Universe.

The above about plasma is from the well-researched and science-based book by Robert Temple, 'A New Science of Heaven', put into my words.

As I wrote in 1971 at age 17,

*"Traveling along the myriad roads  
so many lead to nowhere  
the happiness they bring  
is there and gone  
after reaching the highest point  
they allow  
one may go no further.  
But the Joy of being  
One with the Universe  
knows no limits,  
for the Universe is without limit."*

Playing with an A.I. art app helped me go through my initial resistance (as in general, A.I. art has appeared to me flat, soulless, square and often distorted) and gave me a more rounded perspective. Now I am neither overly-amazed by computer-generated **NFT** art nor so dismayed, but see it more neutrally and can accept and appreciate it for what it is. This image is one of my beginner's creations.

Input is appreciated.

#### Ode to Solar Logos

a.k.a. Central Sun, Christ Consciousness, Highest Self/Non-Self

*Heart to Heart  
Plasma to Plasma  
Essence to Essence  
Meeting in the Stillpoint*

*'O Solar Logos,  
open my head and heart to heal and feel.*

*Deepen my awareness of your presence,  
and make of me a new human:  
guided by the inner compass,  
living from the present moment,  
and serving love for love itself.*

*This I pray and decree, amen, so be it.'*

*Or simply,  
'Constant felt connection with the essence of Solar Logos.'*

#### COMMENTS

##### Natica Solari

I love your poem as it pertains to Temple's book 'A New Science of Heaven', and written so long ago. Such a profound few lines at such a young age, not to mention the 70's! Wow! I am in awe!

When I look back through my past at the songs, movies, and books I have loved through the years it paints quite the picture. As if I have been leaving myself bread crumbs through my years reminding me of who I am and where HOME truly is!

My journey started two years ago when I had a spontaneous Kundalini awakening, and has been a wild ride ever since. I dialed out of the mainstream a long time ago which made it so much easier to bond with nature and get in tune with Gaia.

Solfeggio music helped tremendously in balancing out the energy I was trying to process. I felt like an air traffic controller that should have been fired! These days things are pretty smooth, and has resulted in me being trusted with more 'gifts'.

These pages (Starseed Activation Group) help me process what is happening and gives mw comfort knowing that there are others that are experiencing the same things. Rather than being filled with anger over the state of the world, I have finally crossed into the peaceful center knowing that the best is yet to come. Thank you for your post!

**Merrilee Hayes**

I do love your posts!  
When I had my Awakening to be specific kundalini Awakening I got information about the plasma and crystalline so it's interesting when I see it's been talked about  
And I like what you said when you were 17 tell me what made you the way you were at a young age did something specific happen to you or you just feel that you were awake to God createor, universe energy whatever you call it all same thing

**Gary**

I'd like to read more about the information you got (as a download?) about plasma and crystalline.  
  
I was naturally attracted to the mystical from early childhood, and that stayed with me throughout my lifetime.

When I was 12, my older brother died when the car he was driving went off a mountain road. Nine years later, my beloved younger brother died when the car he was driving was hit by a drunk driver. I was already attuned to the beyond, but those experiences deepened my connection. Also, though I had no diagnosis until late in life, my neurology (Asperger's and misophonia) had a strong influence.

Thank you for asking, and sharing.

May I add your comment to my post?

**Mary Cantu Hill**

I like your new art form Gary. It seems to suggest the wizard/magician with the staff ready for transformation. It sparkles and glows. 🌟
